

Supported Living System

ReMed's Supported Living System (SLS) provides long-term rehabilitation and supported living to individuals in community-based apartments. Services are provided seven days a week, 24-hours a day. On average, current individuals in the apartment programs receive .5-1 hour of Psych treatment weekly. All therapies are available for individuals in this program as determined by their treatment plan. These individuals are capable of performing self-care tasks and demonstrate skills sufficient to live in a community setting with structure and support services.
