

Supported Living System

ReMed's Supported Living System (SLS) provides long-term rehabilitation to individuals who require varying levels of support on a 24-hour basis. Residential services are provided in small houses with a structured, semi-independent environment. Individuals are capable of performing most self-care tasks and demonstrate skills sufficient to live in a community setting with structure and staff support. Services are provided seven days a week, 24-hours a day. On average, current individuals in SLS receive 1 hour of Physical Therapy, 1 hour of Occupational Therapy, .5 hours of Speech Therapy, and 4 hours of Psych treatment monthly.
