

# Gilroy Residential Programs

Gilroy provides a continuum of residential programming that addresses Neurorehabilitation and Supported Living needs. The NR programs provide intensive rehabilitation, medical, neurobehavioral, and neurocognitive management, comprehensive assessment and evaluation services, and dual diagnosis programming on either a short- or long-term basis. SL programs provide supports and services in a group home setting. Services focus on maximizing a person's independence, establishing and maintaining medical and mood stability, and developing a productive stable activity plan within the community. All services are provided seven days a week, 24-hours a day. Functional abilities and behavioral status are assessed and individualized treatment plans are designed to facilitate communication, conflict resolution, behavioral management techniques, independence in daily living skills, vocational pursuits, and leisure interests. Success in these areas enables individuals to move on to more independent settings.
