## Type of Injury

## Cause of Injury

## Funding Sources

100% Worker's Comp

## Comprehensive Therapy Program:

The Comprehensive Therapy Program consists of 3-5 days per week of services. The program combines services in the clinic as well as the community. Therapies include physical, speech/language and occupational therapies, psychology, and therapeutic recreation. These are delivered through individual therapy, group therapy and staff support implementation and carry over of strategies to home and community. Physiatry and neuropsychiatry are also offered. Services focus on the development of systems and strategies necessary to support medical and mood stability and to maximize optimal participation in life roles in the community and at home.

## Services

## Individual Therapy Program:

Traditional individual therapy services which are offered include: speech/language, occupational therapy, physical therapy, cognitive rehabilitation therapy, psychology and therapeutic recreation. Often individuals with mild brain injury are referred for individual therapy services targeting vestibular therapy, development of compensatory cognitive strategies, psychology and return to work services.
